

## Software Developer (Autonomous Driving)

You will be working hands-on with the highest performance hardware in the on-board electrical system, according to state-of-the-art development processes.

As a Software Developer for Embedded Systems you will be responsible for the design and implementation of innovative software in C++.

You will ensure that the software constantly fulfils the highest standards in terms of stability, performance and security.

### Requirements

- Degree in Computer Science, EE or comparable.
- Very good knowledge of object—oriented software development.
- Expert in C++.
- In-depth knowledge of embedded software development.
- Expert knowledge of continuous integration systems (Jenkins, cMake, ant)
- In-depth knowledge of data structures, algorithms and software design.
- Analytical thinker.
- Fluent English (German highly desirable)
